

Hydrogen Health

A group of four hikers is shown on a rocky trail during sunset. The sun is low on the horizon, creating a strong backlight effect and lens flare. One hiker in the foreground is crouching and reaching out to help another hiker who is standing on a large rock. A third hiker is standing nearby, and a fourth hiker is climbing a rock in the background. The scene is filled with a warm, golden light.

Putting everyday health
care within reach.

Who is Hydrogen Health?

Hydrogen Health

About 30–50% of an employer population probably isn't getting primary care, even though they have coverage.

They're missing out on valuable care:

- Preventive care
- Early detection/treatment
- Coordination of care
- Chronic care management
- Care navigation

Traditional primary care doesn't work for everyone.

When I call to schedule, I usually have to hang up before the wait time is over.

I finally got an appointment, but it's six weeks out. Why bother? I don't have any health problems anyway.

I live too far from my doctor. I can't take the time away from work to go there.

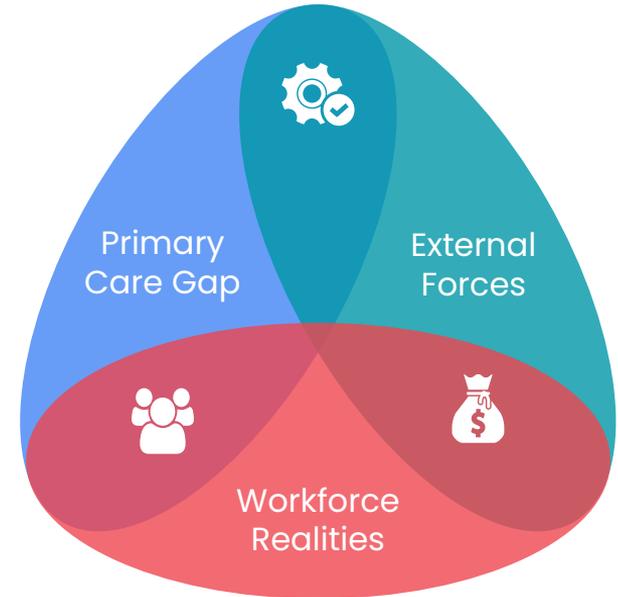

I just don't have time to take care of my own health, with everything going on at work and home.

It's just easier to go to urgent care. Yes, I could have a long wait. At least I'll get seen today. Who cares if the doctor knows me?

Expecting 6.5% - 8% health care trend, aggravated by...

Primary Care Gap Impacts	Workforce Realities	External Forces
<ul style="list-style-type: none"> ▪ Untreated and late-treated conditions ▪ Unnecessary urgent & emergency care visits ▪ Sporadic, episodic care ▪ Variability in the quality of care 	<ul style="list-style-type: none"> ▪ 55+ employees staying longer ▪ "Retirees" coming back ▪ Elevated quit rates ▪ Increased stress ▪ Staffing uncertainties 	<ul style="list-style-type: none"> ▪ Inflation/recession ▪ Long Covid: the next diabetes ▪ Uncertain family-forming reproductive health landscape ▪ Provider shortages & access equity disparities ▪ Rising cost & prevalence of specialty medications

Every cost reduction matters **NOW.**
